

PRODUCT FACTSHEET

RepRisk Data Feed: Banking and Insurance

RepRisk Data Feeds help you to identify, flag, and monitor ESG and business conduct risks in your business

- **What:** A fully integrated solution to systematically integrate ESG and business conduct risks into your firm-wide due diligence processes, allowing you to automatically screen and monitor your client and transaction portfolio on a daily basis
- **Purpose:** Reduces blind spots in your business and flags material risks or violations of your internal policies and international standards for escalation and enhanced due diligence
- **How:** Customized ongoing exports of RepRisk quantitative data (ESG risk metrics, analytics, and the UNGC Violator Flag) fed into your internal risk, compliance, or CRM systems

Who uses RepRisk Data Feeds?

- KYC and client onboarding teams
- Risk and compliance officers
- Underwriting departments
- Client and transaction due diligence teams
- Reputational risk managers
- Third-party and counterparty risk departments

Technical implementation

- Format: CSV or XML files
- Delivery channel: Secure FTP site setup by RepRisk
- Granularity: Daily, weekly, or monthly values
- Data matching: Based on company legal entity name, sector, country of headquarters; ISINs (for public companies); BvD IDs (for private companies)
- Historical data since January 2007 is available separately

Customization options

- RepRisk Violator Index: Customized risk metric that conducts screening and flagging in line with your ESG risk framework, internal policies, and risk appetite
- RepRisk Flags: Screens and flags your portfolio based on your customized list of ESG Issues and ESG Topic Tags, e.g. flag any company linked to child labor in the last two years

The world's leading institutions integrate RepRisk Data Feeds in their business

RepRisk enables compliance with internal policies and international standards
