ESG Risk-Monitoring Tool Covers 50,000 Companies

Environmental, social and governance risk data firm RepRisk says it now covers over 50,000 companies in its ESG Risk Platform.

The **ESG** risk-monitoring tool is a resource for supply chain management and corporate benchmarking. Launched in 2006, it includes risk profiles for companies as well as 12,000 projects globally and across every sector.

More than two-thirds of executives say they plan to [evaluate ESG factors in future deals](#), according to a poll of more than 300 professionals conducted by PricewaterhouseCoopers US last year.
